

AMENDMENT TO THE SPECIFICATION

Applicant amends the specification as described below

Page 14, paragraph 37 is amended as follows:

[0037] As shown in Figures 1 and 8, once the long cylindrical rotating broom **110** is mounted between the rotating pivot arms **32**, the top of the long cylindrical rotating broom **100** may be enclosed with a cover assembly **130**. Depending on the type of sweeping conditions encountered, the cover assembly **130** may include a directional flap for **132** directing snow or debris in a desired direction. An optional dump cover assembly **140** is shown in Figure 9 8.
